The race is over... We won!

Titanium vodka smoothest, tasteless vodka

Titanium Vodka

Tasting Note: Clear color. Mild aromas of meringue, nougat, beeswax, and pepper dust with a soft, dry-yet-fruity light-to-medium body and a dried lime, cellophane, mineral, and pepper finish. A punchy vodka for vodka tonics or genever cocktails

TITANIUM VODKA
LIQUOR : VODKA
ALC./VOL.: 44%
PROOF : 88
SIZE : 750 mL

An extremely competitive and heated race has been taking place between distillers for a few centuries with the goal to make the cleanest tasting Vodka possible. Some have tried to distil glacier water and others have tried to make theirs in Cognac distilleries. In the end, technology has triumphed all these attempts. Titanium Vodka uses unique brewing, cutting edge filtration technology and time-honored traditional distilling techniques to make the cleanest tasting Vodka possible-produced by any distillery, sold at any price.

We start with 2 row malt and we add pure water coming from the natural limestone filtration from 1,200 feet below the surface. Then we add our proprietary yeast strain to start the fermentation process. The blend is then left for almost a month in our 800 barrel horizontal stainless steel tanks to convert sugar to alcohol. Interestingly, other distillers use only 3 to 5 days of fermentation in their production. After this, we send the stream through a specialized filtration process at extremely high pressure that uses a cutting edge Nano Filtration process followed by a unique Reverse Osmosis method.

The final result is a flavorless, clear spirit at 16% alcohol by volume. The spirit we have at this point is as clear as the competitor's final product, and we have not even started distillation. This stream is converted to Titanium Vodka by distilling it in small batches using a pot still vessel not much different than the finest single malt Scotches and Cognacs, followed with fractionation distillation in our tall distillation columns 10 times before it is hand packaged in our custom made glass bottles.

Titanium Vodka is 10 times distilled and its clearest Vodka in the market which makes the best tasting martinis and cocktails. It is made exclusively from natural ingredients, and unlike other vodkas, it doesn't contain any added sugar or glycerine. In fact Titanium is as pure as vodka can be. Still, that purity has a certain taste: Rich, full-bodied and complex, yet smooth and mellow with a distinct character of grain, followed by a hint of dried fruit

Cocktail Recipes

Titanium Watermelon Smash

Ingredients

- Cubed watermelon (6-8 pieces per drink)
- ½ oz Simple Syrup
- Pinch salt
- 1 tablespoon freshly squeezed lime juice
- 1 ½ oz Titanium Vodka

Instructions

Cube watermelon, smash briefly in the bottom of the glass. Add 1 ½ shot vodka, dash of salt. Add ice and soda water- a very mild, watermelon flavor should work well with the vodka, and the vodka-soaked chunks of watermelon are delicious Use caramelized lemon zest as garnish

Titanium Cucumber on the Rocks

Ingredients

- 1 ½ oz Titanium vodka
- 2 slices of cucumber

Instructions

Pour Titanium over ice in a rocks glass. Enjoy

Lemon Lime Fantisco

Ingredients

- 1 ½ oz Titanium Vodka
- ¼ oz simple syrup
- 3 wedges of lime

Instructions

Muddle lime wedges in glass with simple syrup. Add Titanium and crushed ice. Stir and enjoy!
